Unified Access to heterogeneous library services

Dr. Peter Kostädt
Head of IT-Department
University and City Library of Cologne
University of Cologne

- Founded in 1388
- 43,000 students
- Two-tier library system
  - Main library (University and City Library)
  - 145 autonomous faculty & institute libraries
University and City Library of Cologne

- 4 million items
- 70,000 e-journals, 23,000 e-books
- 1,2 million loans per year (self-service via RFID)
- 43,000 active users
  - students + faculty members: 29,000 (67 %)
  - external users: 14,000 (33 %)
Library Portal: Mission

Connect users to content with minimal barriers and maximum speed and ease.
Main Goals

• Single user interface for access to all of the library’s resources and services

• Enhancement of search facilities
  – Open source search engine (Xapian) for local metadata (12 million records)
  – EBSCO Discovery Service for licensed content (> 500,000 million records)
  – Metasearch for union catalogs (ILL)

• Single Sign-On
Main Goals (2)

• Integration of functions for ordering and reservation
  – LMS (SISIS SunRise, OCLC)
  – Patron driven acquisition
  – Inter-library loan

• Aggregation of account data from multiple systems

• Extension of usage reporting
Service-oriented Architecture

Aggregation of e-book metadata

- 23,000 licensed e-books from various publishers
- 365,000 e-books licensed by the DFG (German Research Foundation)
- 1,157,000 free e-books from OpenLibrary.org
- 33,000 free e-books from Gutenberg.org
- 17,500 free e-books from Wikisource
- 1,100 free e-books from the Directory of Open Access Books
China’s Remarkable Economic Growth
John Knight and Sai Ding

ABSTRACT
How has the Chinese economy managed to grow at such a remarkable rate — no less than ten percent per annum — for over three decades? This book combines economic theory, empirical estimation, and institutional analysis to address one of the most important questions facing contemporary economists. A common thread that runs throughout the book is the underlying political economy: why China became a ‘developmental state’, and how it has maintained itself as a ‘developmental state’. The book examines the causal processes at work in the evolution of China’s institutions and policies. It estimates... More

Keywords: Chinese economy, economic theory, empirical estimation, institutional analysis, developmental state, growth rate, inequality
